

PROJECT 2

Social Media Strategy for a New Product Launch

Product: PulseX SmartWatch

Submitted By: C. Chakradhar Reddy

Introduction

This report presents a complete social media marketing strategy for launching the PulseX SmartWatch, an AI-powered wearable designed for health, fitness and productivity. The strategy covers objectives, audience, content, platforms, campaigns, paid advertising, influencer marketing and performance measurement.

Product Overview

AI health monitoring, ECG, SpO₂, heart rate, sleep tracking, stress monitoring, Bluetooth calling, AMOLED display, 14-day battery, GPS, IP68, wireless charging, 120+ sports modes, women's health tracking, SOS and voice assistant.

USP

The smartwatch that understands your health before you do.

Target Audience

18–40-year-old students, professionals, fitness enthusiasts and tech lovers; secondary audience includes senior citizens, travelers and corporate users.

Marketing Objectives

Build awareness, generate leads, increase engagement, drive website traffic, increase pre-orders and sales, and build loyalty.

Platforms

Instagram, Facebook, YouTube, X and LinkedIn with platform-specific content.

Content Strategy

Teasers, product reveal, feature campaigns, educational posts, influencer collaborations, testimonials, giveaways and live sessions.

Creative Themes

Future of Fitness; AI for Everyday Health; Stay Connected Anywhere; Power that Lasts.

Influencer & Paid Ads

Partner with fitness trainers and tech creators. Budget: Instagram 40%, Facebook 25%, YouTube 20%, Google Display 10%, Influencers 5%.

Content Calendar

Week 1: Teasers; Week 2: Reveal; Week 3: Features; Week 4: Reviews, giveaways and live sessions.

SWOT

Strengths: AI features. Weaknesses: New brand. Opportunities: Growing wearable market. Threats: Competition.

KPIs

Reach 1M, Engagement 10%, Website Visits 150K, Followers 50K, Sales 5,000 units.

Conclusion

A multi-platform campaign with engaging content, influencers and paid advertising will maximize awareness and sales.
